Subject: NWOD Implementation Approach - Follow-Up

Hi Kathy and Liz -

The NWOD Working Group is working on an accelerated schedule and is having bi-weekly meetings/conference calls to work through next steps. We have a call scheduled on Wednesday afternoon. If you have any feedback on the implementation approach we sent last week, it would be helpful to us to know before we have our conference call on Wednesday.

Thank you,
Laura

Subject: NWOD Implementation Approach

Dear Kathy and Liz:

This email serves to transmit to you, from the Northwest Oil Drain Working Group, our recommended Remedial Design and Implementation Approach to address remaining sediments in Segment 1 of the Northwest Oil Drain Canal. I have copied the Working Group members with project management and technical evaluation responsibilities on this transmittal.

Please provide any comments or feedback on these recommendations as we are working hard to target Summer 2011 to implement a bypass/excavation program for Segment 1.

Thank you,
Laura
